## Summary

---

Frontend developer with ~4 years of experience in fast-moving startups. I build clean, accessible, and performant UIs with a strong eye for product detail. Comfortable working closely with design and product teams, iterating through A/B tests, and shipping features to real users. Currently expanding into backend development (Node.js, Express, Firebase) through production side projects, and starting a Software Engineering degree in 2026 to deepen my foundations in architecture and systems design.

## Skills

---

**Core:** TypeScript, JavaScript, Vue.js, Nuxt, React, Tailwind CSS, Node.js, Express, Firebase/Firestore

**Tools & Practices:** Git/GitHub, Sentry, PostHog, Google Analytics, A/B Testing, Performance & Core Web Vitals, Accessibility

**Languages:** Spanish (Native), English (C2 Proficient)

## Experience

---

**Frontend Developer** — [Meowtel](#) (Remote, U.S.) 05/2024 – 06/2025

- Owned frontend web development, building and iterating on key user-facing sections while collaborating closely with product and design on UX and layout decisions.
- Contributed to experimentation and A/B testing initiatives, implemented analytics and tracking (Facebook Pixel, PostHog), and optimized performance and Core Web Vitals.
- Participated in the gradual migration of selected components from a Nuxt 3 SPA to a PHP/Twig/Alpine.js stack to support performance and SEO goals.

**Full Stack Developer** — [Asteroid Technologies](#) (Remote, Argentina) 02/2024 – 04/2024

- Developed features for the company website and a new back-office system for "Hablalo", a mobile app. Built with React.js, Next.js, Tailwind CSS, and Firebase. Collaborated with UX/UI designers on new projects.

**Frontend Developer** — [TelCo SAPEM](#) (Corrientes, Argentina) 01/2023 – 02/2024

- Built Wee! Pagos, a payment app using Vue.js, Vuex, and Vuetify. Collaborated with cross-functional teams including UX/UI designers and backend developers.
- Developed Weelpas, a ticketing app for city events using Vue.js, Vuetify, and Pinia. Delivered within a few months with full functionality.
- Contributed to Recolector, a React Native mobile app integrating GPS, camera, and audio capabilities.

## Education

---

**Full Stack Developer** — [Henry Bootcamp](#) (Remote, Argentina) 07/2022 – 01/2023

## Projects

---

**TEXT THE CHECK** — Collaborative expense tracker for group trips via WhatsApp chatbot. Real-time balances, currency conversion (USD/ARS), PDF/Excel export. In closed beta with real users.

Tech: Nuxt.js, Vue 3, Tailwind, Pinia, Node.js, Express, Firebase, WhatsApp Business API | [Live](#) | [Code](#) (2025–2026)

**EL GRAN PEÓN** — Full brand identity and e-commerce for Argentine artisanal goods (mates, leather). Storefront + back-office for inventory/product management.

Tech: Nuxt.js, Vue 3, Tailwind, TypeScript, Node.js, Express, Firebase, Render | [Live](#) | [Code](#) (Feb 2026)

**CRUZAR DEPORTES** — E-commerce for sports jerseys with catalog, cart, and admin back-office. Full product management and Cloudinary image integration.

Tech: Nuxt 4, Vue 3, TypeScript, Tailwind, Pinia, Firebase, Cloudinary | [Live](#) | [Code](#) (2025)
